

HP Connector Box

4:1 Connector

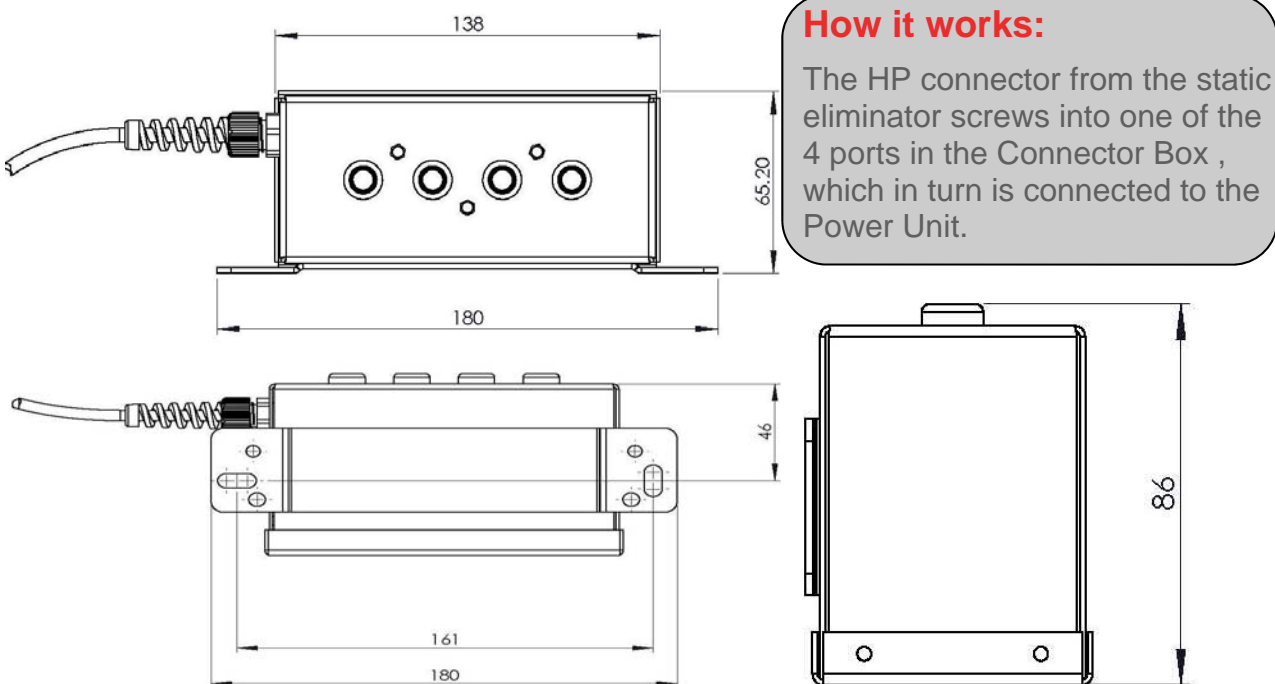

The HP Connector Box allows the operator to have a cable disconnect feature anywhere in the cable system. It can also be used to Increase the effective load on the Power Unit.

Benefits and Advantages

Versatile use with standard Fraser HP connectors

- Cable length 2m unless otherwise specified. Maximum length 10m if within total load of power unit
- High voltage side totally enclosed for safer operation
- Allows the customer:
 - to have cable distribution closer to application.
 - to have a cable disconnect between Power Unit and Static Eliminators (when power is turned off)
 - to serve a larger effective distance without increasing the load.
- Suitable for Fraser 5.5kV HP connectors. 2m of cable to Power Unit is fitted unless otherwise specified. Weight with 2m cable: 800g.
- The power at the Power Unit should be turned OFF before connecting or disconnecting a cable at the Connector Block.
